

NEVE.

1653.

12

A New Almanack and Prognostication, serving for the yeare of our Lord God and Saviour Iesus Christ. 1653.

Being the first yeare after the Bifextile or Leape-yeare.

Wherein is contained a double Kalender, *viz.* the Julian or English Account, and the Gregorian and Forraigne Computation, with the Change of the Moone, her Full and Quarters, and time of the Eclipses: and other necessary obseruation, convenient to be noted.

Calculated, and exactly rectified, for the Elevation of the Pole Article, and Meridian of the ancient and famous City of *Norwich*, and may serve generally for the most part of great

BRITAINE.

Practised, penned, and published, by JOHN NEVE, Gent.

Continued yearly by the same Author, and the thay third time Imprinted.

LONDON,

Printed by S. I. for the Company of STATIONERS.

The Contents of this double Kalender for
 the year of our Lord God 1653. being
 the first yare after the Bissextile or Leape-
 yare, according to the Accompt or
 Computation of the Church
 of ENGLAND.

NEVE. 1653.

A PROGNOSTICATION,
Serving for the yeare of our
Lord God and Saviour
JESUS CHRIST
1653.

Wherein you may observe the
grounds of the alteration and conditi-
on of the foure Quarters of this yeare:
As also the disposition of the Aire, for each seve-
rall Moneth, according to the inclination of the
Cœlestiall bodies, with the change of the
Moone, her full, and Quarters, and the
time of the Eclipses, with other
things fit to bee knowne
and observed.

Calculated, and especially refer-
red to the Longitude and Elevation of
the Pole Artick, of the antient and fa-
mous City of *Norwich*, and may serve
generally for all *England*.

Collected, and Published, By
JOHN NEVE, Gent.

The 53. Edition by the Author.

Printed at London by *W. Wilson* for the
Company of Stationers. 1653.

Since the States Government 4. years January 30.

A Prognostication.

Some briefe generall Rules for Husbandry and Gardening.

The best time to sow all kinde of Cōze, is when the Moone goeth her course in Cancer.

The best time to plant and graft, is in the increase of the Moone, shee being in Taurus, Virgo or Capricornus.

Remove and set young trees from October till February, in the first quarter of the Moone, shee being in Taurus or Capricornus.

Crop trees and fell wood, that the stock may the better and sooner grow againe, when the Moone is in the last quarter.

Fell timber in December and Ian. in the old of the Moone is best: But if you would have it grow againe, cut it downe in the new of the Moone.

The best time to cut Wines, is in the end of January, in February, and in the beginning of March, the Moone increasing in Taurus, Virgo, or Capricornus.

Cut hedges betwene the change and full, from the end of January, till the beginning of June.

Set and sow all kinde of seeds, the moone being in Aries, Taurus, Cancer, Virgo, Libra, Capricornus, Aquarius, or Pisces: But the seeds whose roots be round, must be sowne three or fourre daies before or after the full moone.

Gather all manner of fruits, neere the full Moone, in a dry time, gather flowers and seeds for stoe, at the full of the Moone.

Geld cattell, the moone being in Aries, Sagittarius, or Capricornus: Sheare sheep, cut haye that it may the sooner grow againe: the Moone increasing, that is from the change to the full.

To mucke your land that weedes may not abound, is best in the last quarter of the Moone.

A fit time to kill fat swine is in the increase, nigh the

Neve. 1653.

the full Moone, the lard will the better endur the bo'ning.

Destroy wenches, warts, and Cynnes, &c. in the last quarter of the Moone.

Of all the Eclipses which shall happen this present yeare of our Lord God 1653. according to the Excellent observations of Tycho Brahe, and the plutenick Tables.

There may be observd, and apparently seen, (unto the inhabitants of the world) foure Eclipses, two of the Sun, and two of the Moone, whereof the first of the Moone onely shall be visibly seen in this our Horizon of England, if the weather be faire and cleare. The rest shall appeare in other remote places, as by the relation following may bee noted and obserued.

Of the first Eclipse of the Sun.

Upon the 27 of February in the Gregorian yeare, but in our Julian or English yeare, on the 17 of February, the Sun shall suffer a great Eclipse between 5 and 6 of the clock at night, the body of the Sun shall be almost halfe darkned, unto the people that inhabir in the South part of the land of Magellan, that is under 66. degrees of the Elevation of South pole: The Luminaries at that time being both coniuncted neere the head of the Dragon, in the 9 deg of Pisces, or thereabout. The pointes or degrees Eclipsed will be 5. and 26 min. The totall duration of the Eclipse, unto the Inhabitants seated under the south Pole aforesaid shall be two houres and 32 minutes.

Of the second Eclipse of the Moon.

This totall Eclipse of the Moon, shall sensibly or visibly appeare unto us in our Horizon heare in England, upon the fourth of March, about 4 of the

A Prognostication.

clock in the morning, the being at that time placed not far from Cauda Draconis, diametrically opposite unto the Sun, in oz about the 24 deg. of Virgo, a Signe of the earthly Triplicity, cold and dry, of the complexion of Melancholy, meridinall, feminine, Nocturnall, common, the house of Mercury, his joy and exaltation, the detriment of Jupiter, and the fall of Venus. The Digits of degrees eclipsed will be 17 and 38 min. The whole continuance of the darkness, from the beginning to the ending, shall be fourte
hours and 17 minutes.

Of the third Eclipse of the Sun.

The bright Globe of the Sun (which is the eye of the world, and foundation of light) shall suffer a partie eclipse, upon the 13 of August, about one of the clock in the morning, according to our English computation: this eclipse shall not shew it selfe unto us, but to those that dwell from us more Neatherly, under 66 deg. of the Pole Artick, and in the Longitude of 237 deg. and 11. min. The time of the continuance of this eclipse, shall be two houres and 7 min. unto the people before expressed.

Of the fourth and last Eclipse of the Moone.

The fourth totall Eclipse of the Moone, this yeare of our Lord God 1653. shall not be seen with us, but it shall appeare and be manifested in Charav, in China, in America, and other remote parts. This obscurity shall happen, according to our computation, upon the 28. of August, 45 minuts after 10 of the clock in the forenoone, unto the inhabitants above said: this defect will extend it selfe from the 121 deg. to the 221. degrees of longitude: the totall duration of this Lunar Eclipse, in the Longitude aforesaid, will be 3. houres and 48. minuts.

The

The great coniunctions of great Starrs,

The Eclipse of Sun and Moone :

Doth threat great Death, great Dearth and wars,

If we repent not Soone.

Now God above, and wrath above,

And Heaven above relent :

And man beneath, and sinne beneath,

And Earth beneath, Repent.

Briefe Rules and necessary Observations
concerning Bleeding, Bathing, Purging,
and sweating, according to the motions
of the Moone.

Of Bleeding.

When the weather is extreme hot or cold, it is not
then convenient, either to let blood or to purge,
unless some great necessity do require it: yet notwithstanding
standing, if this blood-letting be for the phrenie, the
Apoplexe, for a continual head-ach, proceeding of
choler or blood, or any hot-burning feber; or other
extreme pain, a man in such a case may not stay for
a chosen time, because the patient might miscary in the
mean season: but in this aforesaid case of extremity,
blood is not to be let in such a quantity, as otherwise
it would, if a chosen time might conveniently be ex-
pected.

The best time to let the Phlegmatick blood is when
the moon is in Aries or Sagitarius, the head and thighs
excepted. For the Melancholy, the moon being in Libra
or Aquarius, the buttocks and legs excepted.

For the Cholerick, the moon being in Cancer, Scor-
pio, or Pisces, the breast and feet excepted.

For the Sanguine, all be good which before is named.

In Spring time let blood at the right side.

In Harbost tke let blood on the left side.

A Prognostication.

Of Bathing.

BAtchings are commonly used rather for pleasure than for profit, specially where hot houses are oversmuch haunted: but I intend not to speake of them otherwile than to advertise those that tender their owne health to be wary and circumspect, in resorting unto them, without cause, and immediatly after or with such persons as be uncleane. Know that it is not good to bath, the Moon being in earthly Signes, as in Taurus, Virgo, or Capricornus, the reason is, because they are of a cold nature, and the nature of cold is to restraine and bind: and so the moone being in these signes, the pores of the body are closed and shut: so that there can be no resolution of humours and superfluities which by bathing ought to bee avoyded. But in fiery signes, as when the moon is in Aries, Leo, or Sagittarius, then it is a good time for bathing, for then the body is apt to resolution; for it is the nature of heat to open and resolve.

It is best bathing two or thre dayes after the change, and at the full of the moone, for then the superfluities are ripe and ready to be avoyded, and disposed to blow and issue out, which indeed is the true end and use of bathing.

If any will enter into the Bath for cleanness sake let the moon be in Libra or Pisces.

Furthermore, if bathing be used for health, let the party grieved learne of the wise Phylician, whether his sicknes hath need of moistening or drying, for if it require moistening, as in Phthisis, and such like, then let him bath in watry Signes, having good aspects with Jupiter or Venus. But if the sicknes require drying, as in Paralyasis, and the like, then let him bath, the Moone being in fiery Signes, having good aspects with Mars and the Sunne.

Also

Also before you enter into any bath, your body must be first prepared & purged, for if you go in unprepared peradventure you may be worse than before.

The best time of the year to bath in is in the Spring, and Harvest, and in the months of May and September.

The best time of the day to go into the bath is one hour after the sun-rising at the least, always provided, that you walk either an hour, or halfe an hour before, and have a stoole either by nature or art: you must cover your head well so long as you be in the bath, and beware you drink not cold drinke, although you be very thirsty, but forbear all things that be cold, lest when you are hot within, cold strike suddenly into some principall member and hurt you.

The time of tarrying in the bath is commonly one hour, but it may be more or lesse, according to the nature of the bath, or sicknes of the party, at the discretion of the wise Physician.

For Purging

In purging these five things ought to be knowne.

1	The humour which aboundeth
2	The best way to avoyd it.
3	The strength of the person.
4	The manner of the sicknesse.
5	The force & nature of the medis- cine.

For when these things are not considered and observed, many perillous accidents may follow, & greatly hurt the body.

Good signes for purging generally are Cancer, Scorpio, and Pisces, particularly with potions or drincks, the Moon being in Scorpio.

Purge with Electuaries, the moon being in Cancer, Purge with Pills the Moon being in Pisces.

Take preparatives, the moon being in Gemini, Libra, or Aquarius.

Take

A Prognostication.

Take homits, the moon being in Aries, Cancer, or Capricornus.

Take Glisters, the moon being in Libra, or Scorpio.

To provoke Meesings, the moon being in Cancer, Leo, or Libra.

To stop Fluxes, Rheumes, and Laxes, the moon being in Taurus, Virgo, or Capricorne.

God to comfort the vertue Attractibe, the moon being in Aries, Leo, or Sagittarius.

God to comfort the vertue digestibe, the moon being in Gemini, Libra, or Aquarius.

God to comfort the vertue Retentive, the moon being in Taurus, Virgo, or Capricornus.

God to comfort the vertue Expulsive, the moon being in Cancer, Scorpio, or Pisces.

For us sing of Unguentz or Platsters, they are best to be applyed and used, when the moon is in that signe which governeth the same member or part of the body to which it is applicable.

For Sweatings.

Sweatings, as they are of two sorts, that is to say

Naturall and Artificiall, so they are used for two ends and purposes: the naturall sweat, if good heed be taken in opening of the pores will dissolve grosse and thick humours, will cleanse the blood, will comfort the spirits, will put away cold, will consume raw humours, qualifie and quench raging fevers, will help numnesse and the droppse.

The Artificiall sweat will cleanse scabs, put away itch, amend dulnesse in hearing, ease the stone, resolve congealed and cold melancholy blood & humours.

What for the better performing and effectuall working in these causes, the counseil of the learned Physitian, is to be desired and used.

The best and mest signes to sweat in, are Leo, Aries, and Sagittarius, and that two or three dayes after the change, and at the full of the moon.

And

And note that sweating is better to be done in the evening than in the morning: for when the body hath nourishment within, the spirits shall not so easily be drawn forth to the extreme parts.

Note further, that leane folks and dayes of fowle persons, must sweat little, for it will hurt them much: but fat folks may sweat well and it will doe them much good.

A Briete Description of the fourre Quarters of this present yeare of our Lord God. 1653.

Of Winter.

WINTER, (which is the chiefeſt ſor for the Spring, the diſgrace of Summer, and the deep devourer of the fruitfull harveſt) began to take his effeſts according to our uſuall computation on the 11. of Decembeſt in the yeare aforesayd, at the firſt entrance of the Sun, into the firſt minute of the ſigne Capricornus, at which time the Sun shall be at his greateſt ſouth declination, from the Equinoctiall line, ſo that he riſeth South-eaſt, and ſetteth South-west.

Now is the Hymall of winter Solſtice, for the Sun is ſo far removed from our Zenith, or vertical point, that he cannot decline any further, and stands at a ſtop or ſtay, and then is the ſhorteſt day and longeſt night in the year, and ſo this Quarter doth continue until the 10. of March next following.

This ſeafon is by nature cold and moyst, unpleaſant for the moſt part to traveleſs, either by ſea or land, & unto aged perſons it is very combrogs & noyſom, cauſing ſuperfluity of rawneſſe, and abundance of cold moystneſſe to over-flow their bodies, to their great troubls and diſquietneſſe.

The diſeaſes and ſickneſſes, moſt like to affiſt mens bodies this quarter, will be rhumes, cougheſ, poſt,

A Prognostication.

poles, quotidian fevers, gouts, palsies, fluxes, cramps, convulsions, epilepsies, apoplexies, colicks, raw indigested humours, hoarseness, and many cold dilatations into severall parts of the body.

Thus will the starres it God aitent,
Whose power alone can all prevent.

Of the Spring.

The Sun (which is the eye of the world) the fountain of light, and the chiefe moderator of all the rest of the lights, hath like a Giant run his race, and finished his revolution (Gradatim) throughout the 12. signes, and now this 10. of March beginneth his journey afresh again, and goeth an even course, and so becomes an indifferent Arbitre between the day and night, and maketh an equality throughout his whole government, to the great joy and comfort of all his revived subjects, chering with his splendent countenance the yore weatherworn weeds of this our dark-star of mortality, (which the darkned countenance of winters extremity, had almost subdued) with his excellent presence, wherewith the earth begins to smile, and to put on her new apparell, the flourishing liberty of fresh Flora.

This season is by nature hot & moist, the most temperate time of the yeare, and the least bresder of sickness that doth procure death; and a very convenient time for the removing of sickness & griefs gotten before, and also to abyde and prevent those that are to come: for now the dull sensess & spirites of man & other creatures are quickned and revived, and therefore the humours which doe abound, and are readiest to oppresse nature, see fit to be emptied and abyded, whether by blood-letting, purging, or otherwise, as the learned Physitian shall advise, and as the cause of the disease shall require: such therefore as be diseased, let them not neglect this time.

Suns

Hundry sorts of sickneses and infirmities, are
ubiect to this quarter, as Tertians, and uncon-
stant fevers, obstructions in severall parts, laundies,
swellings, hot impostumes, squinancies, bleeding at
the nose, itch, yulches, boyles, small pox, tetteres,
paine of the head and eyes, mesells, kings=evil, pe-
tient fevers, and many other diseases, whch may
proceed of the corruption of the blood.

Infection from the startes may fall,
But one above doth slay them all.

Of Summer.

Summer the third part of our vulgar years, accor-
ding to our usuall computatio: now when the sun
hath fully determined the syzing with his last Grade
of Gemini, and hath moved in his motion to the high-
est poynt of his course, namely to the 1 degree of Can-
cer, which shal be this year the 11. of June. Now is
the second Solstice of the year, called the Estival or
Summer Solstice; so even as the sun when he en-
treth Capricornus, hath his greatest south declina-
tion from the Equinoctial line: so now at his ingress
into the beginning of Cancer, he hath his greatest de-
clination toward the north, from the said Equinocti-
all line; and even then as at the time of the winter
solstice he was so far removed frō our vertical point,
that he could move no further towards the South,
and was therfore to approach again towards our
North latitude, at which time he seemeth to stand: so
now being come so near to our Zenith that he cannot
remove no further towards the north, and is therfore
to revert again to the south latitude. At the first go-
ing from us he seemeth also to stand, insomuch that
even as before at his return toward us again, hee
made with us the shortest day and longest night in
the year: so now at his return from us, he maketh

with

A Prognostication

with us contrariwise the longest day and shortest night in the year: and afterwards declineth more and more from us, like as before he moved more and more towards us.

This season according to his proper nature is hot and dry, turning the humours of mens bodies into hardness and dryness, resembling the element of fire and complexion of choler, bringing all fruits to their ripeness, cattell to their fatnesse, and men to their wealth.

The infirmities like to molest and trouble us this quarter, are (according to the judgement of Hypocrates, and other learned writers of Physick) are hot burning fevers, phrenzies, inflammations, pluries, impostumes of the lungs, sharpnes of urine, strangury, ulceration of the spotted fevers, pestilent fevers, heat of blood and choler.

Though starrs incline to worke us ill,
All shall be as the maker will.

Of Autumnne.

A **utumn**, according to our accustomed Computacion, the last quarter of this year, beginneth at the **Suns** departure from the last scruple of **Virgo**, into the first degree of the second **Equinoctiall Signes Libra**, the which wil be this year on the 13 day of September the day and night being of an equali length as in the spring: at which tyme is the **Autumnal Equinoctiall**, for even as at the **Suns** entrance into **Aries**, the day increasing from the **Winter Holstice**, till then came to be equal with the night, going on still more and more till the **Summer Holstice**, when was the longest day and shortest night: so now the night by increasing from the **Equinall Holstices**, to the **sunnes** ingredient into **Libra**, hath got to be equal with the day, and shall increase more & moze, till the **Brumall Holstice**.

Solstice come again, when the night is longest, and the day shorkest.

This time of the year is of it self unconstant & variable, warm in the day time, and cold in the night.

This quarter, because of the inequality of temperature, may, as Hypocrates saith, be called the Mother or Nurse of deadly sicknesses: And as Galen saith, that this time of the year is very dangerous for taking sicknesses.

The bodily sicknesses and diseases, commonly attending this time of the years, are many; as the stone, paine in the back and raine, with stopping & suppresing of urine, much soynt aches, sciaticae, and goutes, many quartaine fevers, falling sicknesses, vertigoes, appoplexies, palsies, lethargies, convulsions, cramps, hemoroids, fistulaes, Tetanus, Dysenteria and fluxes, melancholy, destruction and madness, windiness and obstructions of the spleen, and such diseases as may proceede of gross phlegme, and melancholie.

Thus every Planet in his kind,
Is to performe the Almighties minde.

A Declaration of the inclination, and disposition of the winds and weather, according to the severall motions configurations and influences of the erraticall and fixed starres: with the day, houre, and minute of the change of the Moone, her full, and quarters: And also the rising and setting of the Sunne, in every seventh day of every moneth of this present yeare of our Lord God. 1653.

Of January.

Day.	<i>The Sunriseseth.</i>	<i>The Sunseteth.</i>
1.	houre. 8. and 3. min.	houre 3. and 57. min.
7.	houre. 7. and 56. min.	houre 4. and 4. min.
14.	houre. 7. and 46. min.	houre 4. and 14. min.
21.	houre. 7. and 34. min.	houre 4. and 26. min.
28.	houre. 7. and 23. min.	houre 4. and 37. min.

A Prognostication.

Full Moone the 3. day 36. min. after 5. of the clocke at night,
winterly weather.

Last quarter the 11. day 44. min. after 7. of the clocke at night,
inclined to meysinge.

New Moone the 19. day 58. min. after 6. of the clocke in the
moring, frosty and cold.

First quarter the 25. day 32. min after 1. of the clock at night,
windy and unconfiante.

Januaries Abstract.

If this moneth let not bloud, neither use but little
Physick, except great necessity constraines thce, and
beware of taking cold, for in this moneth **Whermes**, &
Flegme doe much increase: to fast long is hurtfull, but
to drinke white-wine fasting is good & wholesome, use
meates that are naturally hot moderately, and weare
warme cloathes.

In worldly busnesse, this moneth you may set all
kind of common fruit trees, or plants, as **Peares**,
Plum, **Cheerie**, **Silbert**, **Walnut**, and such like: **Hawthorne**, and all sorts of **Quick-set**, or plants an-
sueted to be generally set from the change to the first
quarter,

Take away mosse and superfluous branches from
your trees: and this moneth is good to set **Beans**,
Pease, **Parsnips**, **Radish**, **Leeks**, **Garlick**, **Turnips**,
and **Onions**, if the weather porbe mild, and the moon
past the full: you may begin to graft at the end of this
moneth so as the moon be increasing in her light.

God husbands also this moneth crop their trees,
fell Timber, and geld cattell, such as are to be gridaed,
the state of the moon alwayes considered.

Of February:

Day.	The Sun riseth.	The Sun setteth.
1.	houre 7. and 13. min.	houre 4. and 47. min.

Full

Neve, 1653.

night, Full moone the 2. day 19. min. after 10 of the clock in the forenoon, frosty and cold.

night, Last Quarter the 10. day 18 min. after 3 of the clock in the afternoon, fitting the season.

in the New moone the 17. day 31 min. after 5 of the clock at night, some fall of moisture.

night, First quarter the 24. day 3 min. after 9 of the clock in the forenoon, frosty and cold.

Febraries Abstract.

12 this moneth all slimy fish, Hift and Rice, and such like, that doe oppilate and stop the Liver and heines, or thicken the blood, are to be eschewed as enemites to health. and also yet forbeare Physick, and letting of blood, except necessity do urge, and learned Counsell do advise you: beware now of taking Cold, for now are Agues apt to be taken, and it is very ill to take heates and afterwards sudden cold upon them.

Now is the most apt time to graft or plant, and to set all kind of trees and bushes, the wind and weather, and age of the Moon considered, Pease, Beanes, Hastings, Onions, Parsenips, and such like, as in January, may very safely be set in the want of the Moon.

The time is now to trim up Gardens, to set and sow all kind of Kichen Herbs, to set slips, sow kernels, mustard-seeds, oars, set hops, cut vines, and propn them, sickling your Rounclball Beaste and Hastings.

Of March.

Day. The Sun riseth. The Sun setteth.

1.	hour 6. and 20. min.	hour 5. and 40. min.
7.	hour 6. and 8. min.	hour 5. and 52. min.

21.	hour 5. and 16. min.	hour 6. and 44. min.
28.	hour 5. and 22. min.	hour 6. and 38. min.

Full moone the 4. day 5 min. after 4 of the clock in the morning, cloudy and uncertain.

Last quarter the 12. day 55 min. after 6 of the clock in the morning, answerable to the season.

New moone the 19. day 50 min. after 2 of the clock in the morning, some inclination to rainne.

First quarter the 25. day 7 min. after 8 of the clock at night, cloudy and moist weather.

C

Marches

A Prognification.

Marches Abstract.

In this Moleheth the humours of Mans body begins to increase, and now gross feeding breedeth gross blood and gross humours, and therefore use meates of good digestion, and such as breed good juice: it is a good time purging and clarifie the blood by potions, barbings, and bloodletting or such other waies as the learned Physician shall appoint and as the cause of the disease shall require: Also thin meat and drynks are commendable.

The time of grafting as yet endureth, together with setting, sowing, provning, plashyng of Vines, and hopps, willow, oates, pease, onions, parsnips, and such like.

OF APRIL.

Day.	The Sun riseth.	The Sun setteth.
1.	hour 5. and 18 min.	hour 6. and 42. min.
7.	hour 5. and 6. min.	hour 6. and 54. min.
14.	hour 4. and 54. min.	hour 7. and 6. min.
21.	hour 4. and 39. min.	hour 7. and 21. min.
28.	hour 4. and 29. min.	hour 7. and 31. min.

Full moone the 2 day 36 min. after 9. of the clocke at night
fair and windy.

Last quarter the 10 day 54 men. after 6 of the clocke at night, cloudy and windy.

New moon the 17 day about 3 P.M. of the clock in the forenoon stormy and unconstant.

First quarter the 23 day 10. min. after 11. of the clock at night, windy and unconstant.

April Abstract.

In this moneth of Aprill, the poore of mans body are opened, and apte to receive Physick, and they that refuse the same, I committ them to the benefit of nature, for of all times of the year, this is the best tyme to prevent causes of sicknes, especially remedy in extremities, for now nature doth renew strength through all the body: so where sickness hapned he loseth unburdened by means of Physick, whence what it cannot doe new, will hardly be done hereafter, therefore take tyme whiles tyme is, &c.

As yet you may graft and propagate vines, and also set melons, cucumbers, artichokes, and polo-bonito hairy. Tanners apply themselves to tanning of skins.

Neve. 1653.

Of May.

Day.	<i>The Sun riseth.</i>	<i>The Sun setteth.</i>
1.	hour. 4. and 23. min.	hour. 7. and 37. min.
7.	hour. 4. and 15. min.	hour. 7. and 45. min.
14.	hour. 4. and 5. min.	hour. 7. and 55. min.
21.	hour. 3. and 56. min.	hour. 8. and 4. min.
28.	hour. 3. and 50. min.	hour. 8. and 10. min.

Full Moone the 2 day, 30 min. after 1. of the clooke in the afternoon, some overcasting clouds for raine.

Last quarter the 10. day, 29 min. after 3. of the clock in the morning, lowring and unconstant.

New moone the 16 day, 51 min. after 6. of the clock at night, answerable to the season.

First quarter the 24. day, 33. min. before 1. of the clooke in the morning, som what cloudy.

Mayes Abstract.

In this moneth rise early, for May doth not love any flog-gards, and let such as bee in health and able walke into the fiedes, and eate and drinke besimes for it is good and holesome, abstaine from all meates that be of a hot nature: and such as be sick, it is a very good time of the yere to let blood, or to take Physick: such as bee whole, God keepe them in health, and such as bee sick. God send them good Physickes and Physick.

The time is now fitting to sow Barill, Marjerom and such ffe seedes as before might not be sowne, because of the coldnesse of the weather. Set Sage according to the proverbe, set sage in May and it will last alway, sow flax and hemp, set Artichokes, weed your Hops, and Gardens, set to your grafts that no superfluous branches trouble them. May dew, Rosemary flowers, and heaneflowers, may at your pleasure be distilled this moneth, and now also haue a care of watching your bees.

Of June.

Day.	<i>The Sun riseth.</i>	<i>The Sun setteth.</i>
	hour. 3. and 49 min.	hour. 8. and 11. min.
	hour. 3. and 46 min.	hour. 8. and 14. min.
	hour. 3. and 47 min.	hour. 8. and 13. min.
	hour. 3. and 49 min.	hour. 8. and 11. min.
	hour. 3. and 52 min.	hour. 8. and 8. min.

A Prognostication.

Full moone the 1. day, 15. min. after 3 of the clocke in the morning, overcasting clouds for moysture.

Last quarter the 8. day, 51. min. after 9 of the clocke in the forenoon, reasonable temperate.

New moone the 15. day 11. min. after 3 of the clocke in the morning, pleasant weather.

First quarter the 22. day, 20. min. after 5 of the clocke in the afternoon, setting the season.

Full Moone the 30. day, 27. min. after 3. of the clocke in the afternoon, fayre and temperate.

Junes Abstract.

In this moneth, if thou must needs use Physick take it early in the morning, that it may have wrought before the heate of the day, and use a light and thin dyet, for the stomach is not able to digest as in winter, or in some of the former moneths, and it is very good and convenient for some to drinke clarified wydy, boyled with cold beards, and to abstatine from violent exercise.

Distilling of roses, making of syrups and conserves, now in prime, now gather such herbs as you meant to keepe all the yeare, but be sure you dry them in the shade. Good husbands and husbandes are now weeding their corn and gardens, & others herding their sheepe, the thyme serveth for rosemary, & gillyflowers, take heede of cutting her trees or herds with kniffe, but rather gather them with your fingers, now you may set saffron, carry out compoud make hay, rid gardens of mayles, ants, or pismires, &c.

Of July.

Day.	The Sun riseth.	The Sun setteth.
1.	hour 3. and 54. min.	hour 8. and 6. min.
7.	hour 3. and 59. min.	hour 8. and 1. min.
14.	hour 4. and 7. min.	hour 7. and 53. min.
21.	hour 4. and 20. min.	hour 7. and 40. min.
28.	hour 4. and 30. min.	hour 7. and 20. min.

Last quarter the 8 day 15 min. after 8 of the clocke in the morning, stormy weather.

New moone the 14. day, about one of the clocke in the afternoon, pleasant weather.

First quarter the 22. day, near about 11. of the clocke in the forenoon, inclined to raine.

Full moone the 30. day, 25 min. after 1. of the clocke in the morning, windy and unconstant.

July 1.

Julies Abstract.

If this moneth use cold herbes & meates, abstaine from
 in the physicke, and now the rives are more wholesome then the
 herbes, let the sun be up before you walke abroad, in the time
 in the fany pestilence or plague, keepe your chamber windowes
 but opening them when the sun hath force of shyning, and
 in the be sure to perfume your chambers every morning with
 herre upon a chassing dish of coales, then whiche nothing is
 in the better, and use Cardus Benedictus, boyled and drunke fastynge.
 Hay hast now callis slack husbands to worke, and such
 as have leasure, it is good to follow soz wheat, & to carry one
 take toyle, & to gather seedes & flowers to keepe all the yere, and
 before to dry them in the shade, till they be almost dry and then set
 for to hem a while in the sun, & in like manner you may use your
 of the herbes.

Of August.

The sun riseth.

hour 4. and 36. min.
 hour 4. and 48. min.
 hour 5. and 0. min.
 hour 5. and 16. min.
 hour 5. and 27. min.

The sun setteth.

hour 7. and 24. min.
 hour 7. and 12. min.
 hour 7. and 0. min.
 hour 6. and 44. min.
 hour 6. and 33. min.

Last quarter the 5. day, 57. min. after 7. of the clock at
 night, cloudy and wavering.

New moone the 13. day, 28. min. after 1. of the clock in the
 morning, apt for the time.

First quarter the 21. day 26. min. after 2 of the clock in the
 morning, faire weather.

Full Moon the 28. day, about 11 of the clocke in the fore-
 moone, some fall of moyiture.

Augusts Abstract.

If August, moderate dyet is good Physik, for now it
 is dangerous to surfe, and take heed of heates and then
 of colds, for nothing sooner engendereth plurishes, and use
 not to sleep much, especially in the afternoone, for making
 dilatations and for avoiding of Agues and head-ach & Ca-
 bares, and now let a man abstaine from physick except ne-
 cesse, and if he be compellid,

Now Lady Ceres lookes to have men enough to attend
 in her, they that would have good seedes for their gardens the
 next yere, must now gather of their owne, least in buying
 in they loose their labour and their moone, and such as desire
 to have letyce, or other herbes for winter, may sow seedes
 when the increase of the moone.

A Prognostication.

Of September.

Day

Day	The Sun riseth.	The Sun setteth.
1.	houre 5. and 34. min.	houre 6. and 26. min.
7.	houre 5. and 46. min.	houre 6. and 14. min.
14.	houre 6. and 2. min.	houre 5. and 58. min.
21.	houre 6. and 14. min.	houre 5. and 46. min.
28.	houre 6. and 28. min.	houre 5. and 32. min.

Last quarter the 4 day 45. min. after 2 of the clocke in the morning, inclined to moystur.

New moone the 11 day 28 min. after 4 of the o'cock in the afternoon, answerable to the time.

First quarter the 19 day, 35 min. after 8 of the clocke at night, somewhat windy.

Full moone the 26. day, 41. min after 8 of the clocke at night, reasonable temperate.

Septembers Abstract.

In this moneth such as have need, may safely take physick, also may bath and bleed, in this moneth all things are in their proper nature and vertue, and such fruite as are ripe and not infected, are good to eate for such as have good humours: Time is good to make conserve of Barberries, Quinces, winter herbs may now be sowne, likewise is the time to set Cresshokes, Rose trees, Apple trees, garden Strawberries, violets, gillyflowers; Apples are to bee gathered in the full of the moneth, sow Parsleys, and in dry weather gather your Hops; Good husbandry is sowing Pease and Oyleheat, good husbandry is making of Ceriac and plucking of Hemp.

Of October.

mornynge, apt for the tyme.

First quarter the 17. day, 56. min. after 11. of the clocke at
ight, windy and moist.

Full moone the 24 day, 39 min. after 3. of the clocke in the
afternoone, frosty and cold.

Novembers Abstract.

¶ November finish the physick you meane to take, & so rest
till March, except some great necessity doe constraine you.
Use good meate, and holosome wyne to nourish thy blood y^eo-
de: hee warme cloathing and a goe dry of thy feet, or else be
re to be troubled with Rheumie and Hose, besides some
other inconveniencie that will ensue. Beware of the Hot-
ouse this moneth, and use Btony and Cynamon in drynk,
In the new of the Moone, you may remove young trees,
In the last moneth, and set Crabtree stockes to graft on,
ben you please, it is good tyme in the wane of the moone to
pease, and beanes, and if the weather be not hard, it is
good sowing of Parsenips, good making of malt, and kill-
ing of Beeves or swine.

Of

A Prognostication.

Of December.

Day.	<i>The Sun riseth.</i>	<i>The Sun setteth.</i>
1.	hour 8. and 12. min.	houre 3. and 48. min.
7.	hour 8. and 14. min.	houre 3. and 46. min.
14.	hour 8. and 15. min.	houre 3. and 45. min.
21.	hour 8. and 12. min.	houre 3. and 48. min.
28.	hour 8. and 7. min.	houre 3. and 53. min.

Last quarter the 1. day 8. min. after 6 of the clocke at night
winterly weather.

Decembers Abstract.

In this moneth of December, keepe thy body and head fr
cold, and eate such meates as be of a hot quality, abstain
from Physick, & let thy Kitchen be thy Apothicary, war
clothing thy nurse, mery company thy keeper and good
pitality thy exercise.

Remove trees and bushes, if the weather yroove not
extreme, in the wane of the moone, set hauens, pease, &
those hearbs that cannot endure the cold, cover them w
straw from the frost and sowe.

Soli Sapienti Deo, Sola Gloria.

FINIS.
